TEMPORARY GOLF SHOP Frequently Asked Questions

How much should our customer plan to invest per month to look and operate professionally while in our temporary facility?

A 600 to 1000 square foot temporary facility will be in the \$1,100 per month plus tax range. All fixtures are manufactured out of cherry and have a clear finish.

How long can my customer rent fixtures for?

Your customer can rent the temporary shop fixtures until they are ready to move into their permanent shop.

Are there any up-front fees?

Your customer is required to submit the first and last months rental fee, along with a \$500 security deposit.

How much will shipping cost?

Your customer is responsible for freight charges to and from their facility. The shipping cost varies according to each location. We make every effort to reduce the shipping cost by sending the fixtures with another shipment to your area if possible.

Is installation included?

No. Our temporary shop fixtures require minimal installation. On most occasions, the trucking company will unload the fixtures, but your client is responsible to place in the desired location and simply screw the tops of the wall units to studs. They should schedule two people from their grounds/maintenance team to help with installation.

Is it possible for my client purchase these fixtures?

If your customer decides to, at any time, purchase the temporary fixtures, the policy is as follows:

- Within the first 1 to 15 months - 40% of rental fees will go towards the purchase price.
- Between 16th & 20th month - 45% of rental fees will go towards the purchase price.
- Beyond 21th to 36th month - 50% of rental fees will go towards the purchase price.
- Beyond 36 months - 60% on rental fees will go towards the purchase price.
